Aloha! You are being asked to take part in a research study that will determine your preferences for outdoor recreation as part of an investigation conducted by the University of Hawai'i - Manoa. You have been selected to participate because you are either a Hawai'i resident, an out-of-state U.S. resident, or an international tourist who visited Hawai'i within the past year or two, and you are at least 18 years old.

Project Description – Activities and Time Commitment: If you decide to take part in this project, you will be asked to fill out a survey. The survey questions are mainly multiple choice. However, there will be a few questions where you may add an open-ended response or select recreation sites on a map. Completing the survey will take between 10 and 20 minutes. We expect around 900 people will take part in this project.

Benefits and Risks: There will be no direct benefit to you for taking part in this project. We hope that the results of this study will lead to a better understanding of the economic impact of environmental changes and we are hopeful that the results will be used to inform future environmental policy in Hawaii. There is little risk to you for participating in this project.

Confidentiality and Privacy: The study collects no personal identifying information - you will remain anonymous. The records from this study are kept private and only UH researchers will have access to them. Please do not include any personal information in your survey responses.

Voluntary Participation: You can freely choose to take part or to not take part in this survey. There will be no penalty or loss of benefits for either decision. If you do agree to participate, you can stop at any time.

Questions: If you have any questions about this study, please call or email me Kirsten Oleson at 808-956-8864 or koleson@hawaii.edu. You may contact the UH Human Studies Program at 808.956.5007 or uhirb@hawaii.edu to discuss problems, concerns and questions; obtain information; or offer input with an informed individual who is unaffiliated with the specific research protocol. Please visit <https://www.hawaii.edu/researchcompliance/information-research-participants> for more information on your rights as a research participant. Please print a copy of this page for your reference.

WTP Prompt

The next section is a choice experiment to assess preferences and willingness to pay for trail attributes. You'll choose between hypothetical management scenarios, each with four attributes: forest health, trail condition, crowding, and cost. **Please read the definitions below carefully.**

Forest health – The diversity of native plants and wildlife, along with the condition of trees, vegetation, and overall ecosystem health, including resilience to pests, diseases, and wildfires.

Trail condition – The quality of the trail's surface, including maintenance, ease of navigation, and absence of hazards like erosion or overgrowth.

Crowding – The density of trail users, which affects the sense of solitude, ease of movement, and overall user experience.

Additional cost – refers to the price each adult would pay per use for that hypothetical trail scenario.

Remember that revenue earned will be used to properly maintain trail health, condition, and longevity.

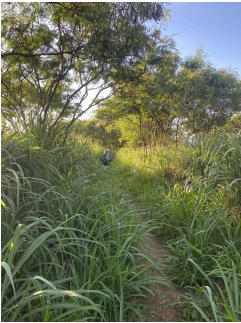

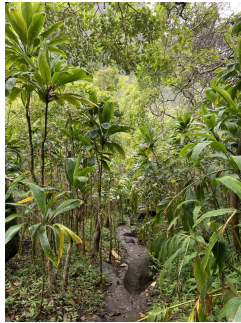

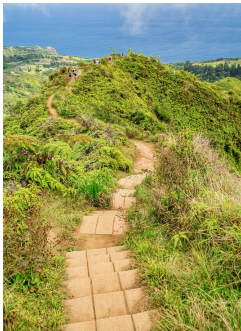

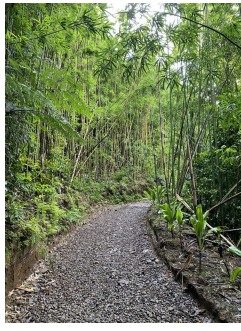

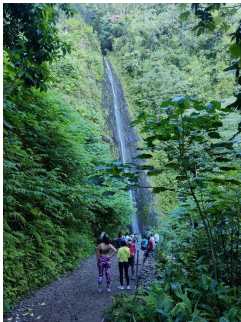

In assessing which scenario you would prefer, you can also choose “NONE: I wouldn’t choose any of these” if both scenarios are unfavorable to you.

Certainty follow up

How certain are you about the decision you just made regarding your willingness to pay?

			Very Uncertain	Somewhat certain	Neutral	Very Certain	Extremely Certain
			0			10	

Payment Preferences

Would you be willing to pay an entrance fee to support trail management efforts? (e.g., improving forest health, crowd control, restoring trail condition)

☐ Yes

☐ No

Cost Allocation & Usage Behavior

Who do you think should bear the majority of the cost for trail management?

☐ Non-residence

☐ Equal distribution

☐ Other

☐ Residence

☐ State government

How likely are you to use trails that require a user fee?

		0	10	
		☐		

If trail fees were implemented, which of the following potential improvements would make you most confident and least confident that your contribution is helping improve trail management?

	MOST confident	LEAST confident
Improved forest health and biodiversity	☐	☐
Enhanced trail maintenance and condition	☐	☐
Reduced overcrowding	☐	☐

If most trail users choose to pay usage fees, which of the following improvements do you think would be the most and

least effectively addressed?

	MOST effective	LEAST effective
Improved forest health and biodiversity	☐	☐
Enhanced trail maintenance and condition	☐	☐
Reduced overcrowding	☐	☐

Volunteer hours and WTP

Would you be willing to volunteer [X hours] as a one-time contribution to support a specific trail management improvement, such as restoring trail conditions, enhancing signage, or addressing invasive species?

- ☐ Yes (How many hours)
- ☐ No

If access fees were partly used to compensate volunteers for their time and efforts, how much more would you be willing to pay per visit, in addition to your initial willingness to pay?

Environmental profile

In the past 12 months, have you participated in any volunteer activities related to trail maintenance or habitat restoration?

☐ No

☐ Yes

In the past 12 months, have you paid a fee to access a natural area (e.g., park entrance fee, trail permit)?
